Home / I'm Learning / India\_Internship Version 2\_DTC\_CYBESS / Course Completion / Final Quiz India\_Internship Version 2\_DTC\_CYBESS Course Home Question 21 P Correct Mark 2.00 out of 2.00 Which utility uses the Internet Control Messaging Protocol (ICMP)? Select one: ping ○ NTP  $\bigcirc \ \mathsf{RIP}$ DNS Refer to curriculum topic: 7.3.1 ICMP is used by network devices to send error messages. The correct answer is: ping Question 22 Correct Mark 2.00 out of 2.00 What are two incident response phases? (Choose two.) Select one or more: detection and analysis containment and recovery confidentiality and eradication prevention and containment mitigation and acceptance risk analysis and high availability Refer to curriculum topic: 6.3.1 When an incident occurs, the organization must know how to respond. An organization needs to develop an incident response plan that includes

The correct answers are: detection and analysis, containment and recovery

Correct	
Mark 2.00 out of 2.00	
Which website offers guidance on putting together a checklist to provide guidance on configuring and hardening operating systems?	
Select one:	
The Advanced Cyber Security Center	
The National Vulnerability Database website	~
Internet Storm Center	
CERT	
Refer to curriculum topic: 8.2.3	
There are several cybersecurity information websites that a cybersecurity specialist uses to evaluate the potential vulnerabilities of an organization of these websites are the National Vulnerability Database, CERT, the Internet Storm Center, and the Advanced Cyber Security Center.	lion.
The correct answer is: The National Vulnerability Database website	
Question 24	
Correct	
Mark 2.00 out of 2.00	
What describes the protection provided by a fence that is 1 meter in height?	
Select one:	
It prevents casual trespassers because of its height.	
The fence deters determined intruders.	
It deters casual trespassers only.	
	~
	•
It offers limited delay to a determined intruder.	•
	•
It offers limited delay to a determined intruder.  Refer to curriculum topic: 7.4.1  Security standards have been developed to assist organizations in implementing the proper controls to mitigate potential threats. The height of	a

Question 25 Correct Mark 2.00 out of 2.00  A specialist in the HR department is invited to promote the cybersecurity program in community schools. Which three topics would the specialise emphasize in the presentation to draw students to this field? (Choose three.)  Select one or more:  a field requiring a PhD degree a job with routine, day-to-day tasks  high earning potential  service to the public  a career-field in high-demand the CompTIA A+ certification provides an adequate knowledge base for the field	

Question 26	
Correct	
Mark 2.00 out of 2.00	
What is a feature of a cryptographic hash function?	
Select one:	
Hashing requires a public and a private key.	
The output has a variable length.	
The hash input can be calculated given the output value.	
○ The hash function is a one-way mathematical function.	•
Refer to curriculum topic: 5.1.1  Data integrity is one of the three guiding security principles. A cybersecurity specialist should be familiar with the tools and technologies used to ensure data integrity.	
The correct answer is: The hash function is a one-way mathematical function.	
Question 27	
Correct	
Mark 2.00 out of 2.00	
Which methods can be used to implement multifactor authentication?	
Select one:	
○ VPNs and VLANs	
tokens and hashes	
opasswords and fingerprints	•
○ IDS and IPS	
Refer to curriculum topic: 2.2.1	
A cybersecurity specialist must be aware of the technologies available that support the CIA triad.  The correct answer is: passwords and fingerprints	
The contest disense is, passificate and images prime	
Question 28	
Correct  Mark 2.00 out of 2.00	
Mark 2.00 out of 2.00	
Users report that the network access is slow. After questioning the employees, the network administrator learned that one employee downloaded a third-party scanning program for the printer. What type of malware might be introduced that causes slow performance of the network?	
Select one:	
spam	
virus	
○ worm	•
phishing	
○ F	
Refer to curriculum topic: 3.1.1 A cybersecurity specialist needs to be familiar with the characteristics of the different types of malware and attacks that threaten an organization.	
The correct answer is: worm	

inia Quz. Attempt review (page 5 0 5)	
Question 29	
Correct	
Mark 2.00 out of 2.00	
Being able to maintain availability during disruptive events describes which of the principles of high availability?	
Select one:	
system resiliency	<b>✓</b>
single point of failure	
uninterruptible services	
fault tolerance	
Refer to curriculum topic: 6.1.1  High availability can be achieved by eliminating or reducing single points of failure, by implementing system resili	ency, and by designing for fault
tolerance.	,, , , , , ,
The correct answer is: system resiliency	
Question 30	
Correct	
Mark 2.00 out of 2.00	
Which access control should the IT department use to restore a system back to its normal state?	
Select one:	<b>~</b>
corrective	•
compensative	
preventive	
detective	
Refer to curriculum topic: 4.2.7	
Access control prevents an unauthorized user from gaining access to sensitive data and networked systems. The implement effective access control strategies.	ere are several technologies used to
The correct answer is: corrective
